

## Fall 2017 Clicker Guide

---

Beginning in Fall 2017, all clickers must be **licensed and registered to a myBama account**. These steps ensure that your professors can upload your clicker responses to Blackboard.

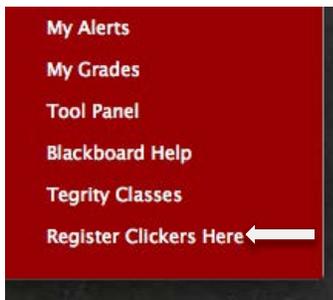

If you registered a clicker by Spring 2017, follow the instructions [below](#).

If you have **not** previously registered your clicker, follow the instructions on [page 3](#).

### If You Registered a Clicker by Spring 2017

If you had a clicker registered to a Blackboard course by the Spring 2017 semester, your device has automatically received a 3-year license. However, you must still **register your device** to your Turning Technologies account.

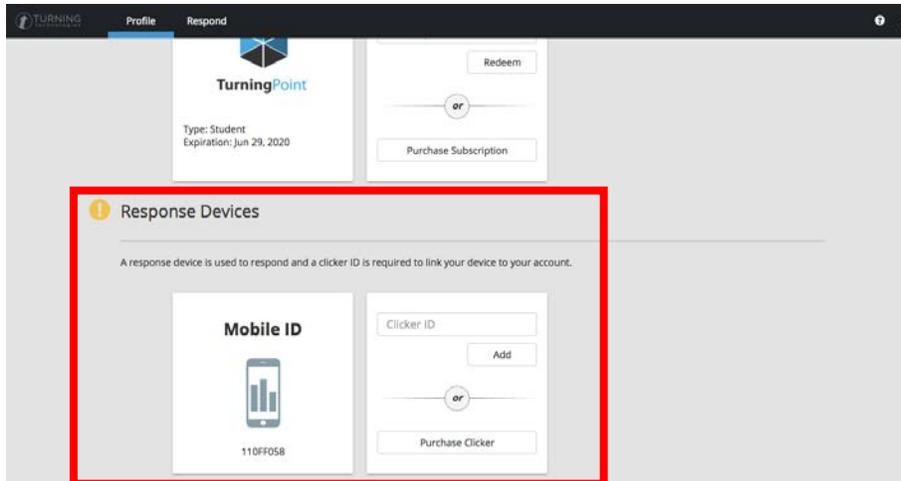

1. Log into Blackboard. Select the course page for the class that requires a clicker.
2. Your professor should have created a link for clicker registration. Click the link.

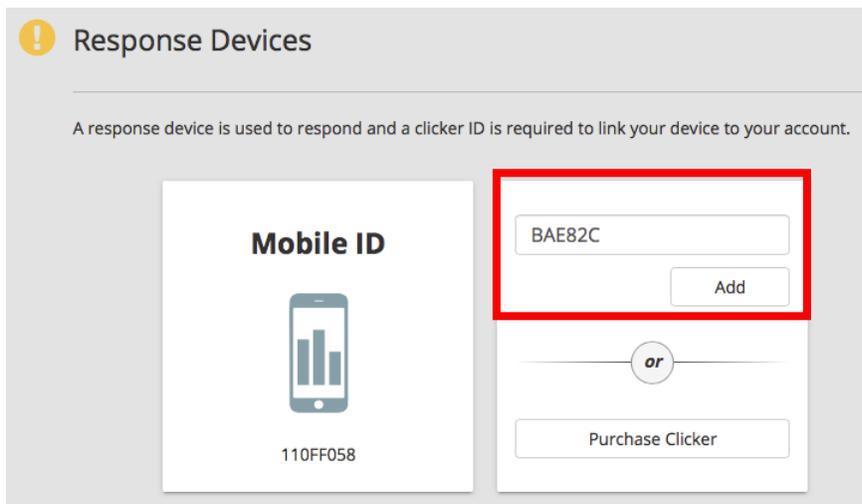

3. A NetID login screen will display. Enter your myBama credentials, then click **Submit**.

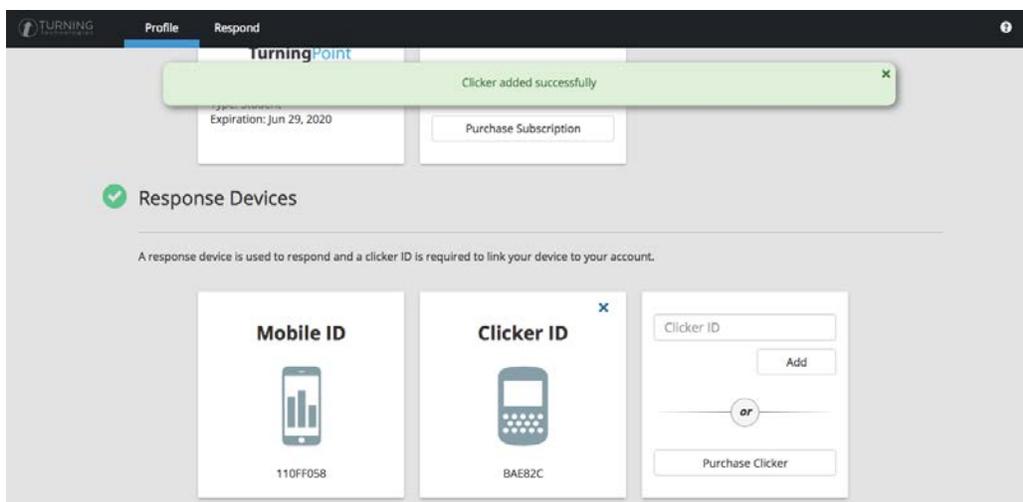

4. You will be taken to your Turning Technologies student profile. Scroll down to the **Response Devices** section.

5. In the **Clicker ID** field, type in the device ID located on the back of your clicker. Click **Add**.

6. If the clicker ID has been entered correctly, a message at the top of the screen will confirm that the device is added to your Turning Technologies account. Your clicker is now ready for use in class.

## If You Did Not Register a Clicker By Spring 2017

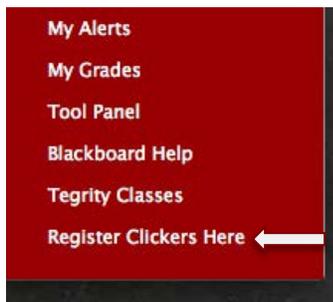

If you did not register your device by Spring 2017, you must purchase a clicker license **and** register your device to your myBama account.

### Buying a License

- **If you have not yet purchased a clicker**, you can buy a clicker and 4-year license bundle for \$72 from the Supe Store. They are available in-store and through the [Supe Store website](#).
- **If you plan to use a pre-owned clicker**, you can buy a 4-year license for \$49.40 from the Supe Store. They are available in-store and through the [Supe Store website](#).

### Registering Your Clicker

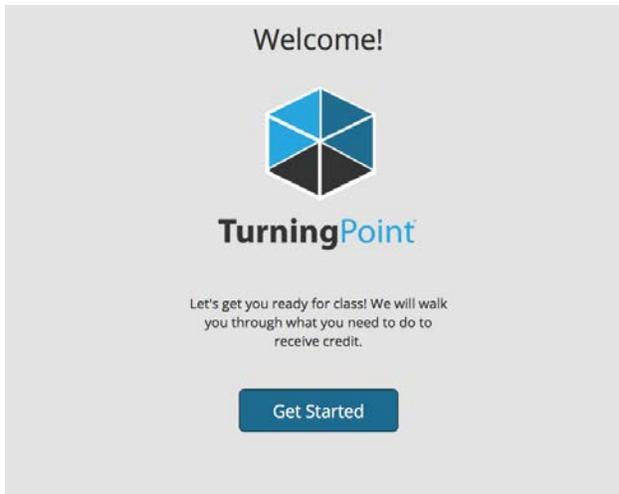

1. Log into Blackboard. Select the course page for the class that requires a clicker.
2. Your professor should have created a link for clicker registration. Click the link.

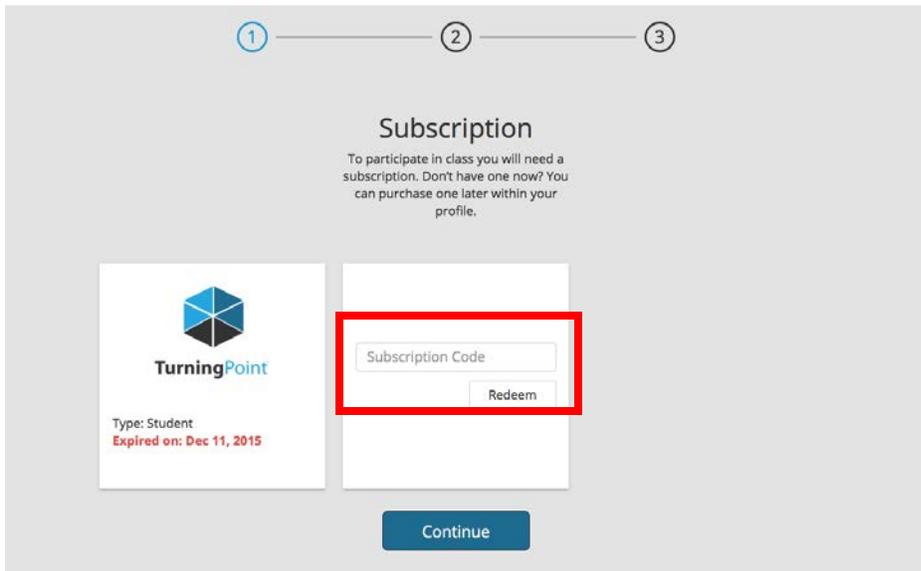

3. A NetID login screen will display. Enter your myBama credentials, then click **Submit**.

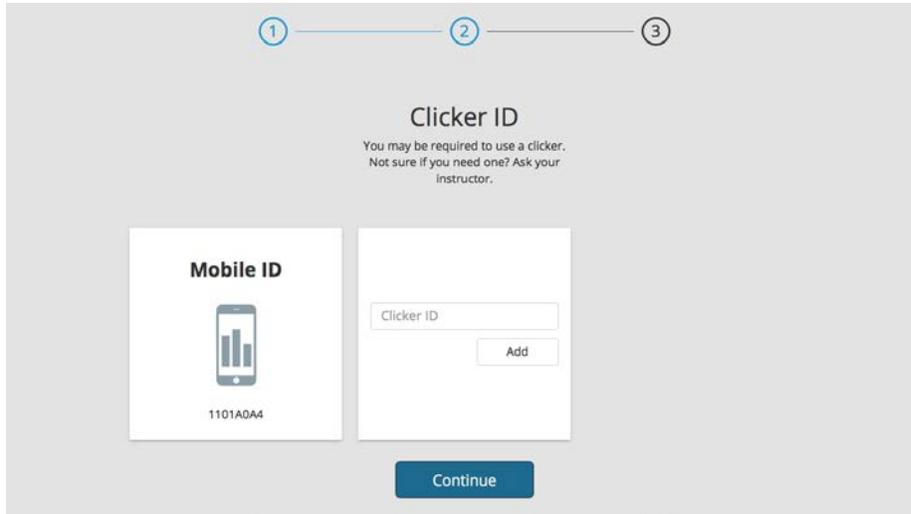

4. You will be taken to a landing page on the Turning Technologies website. Click **Get Started**.

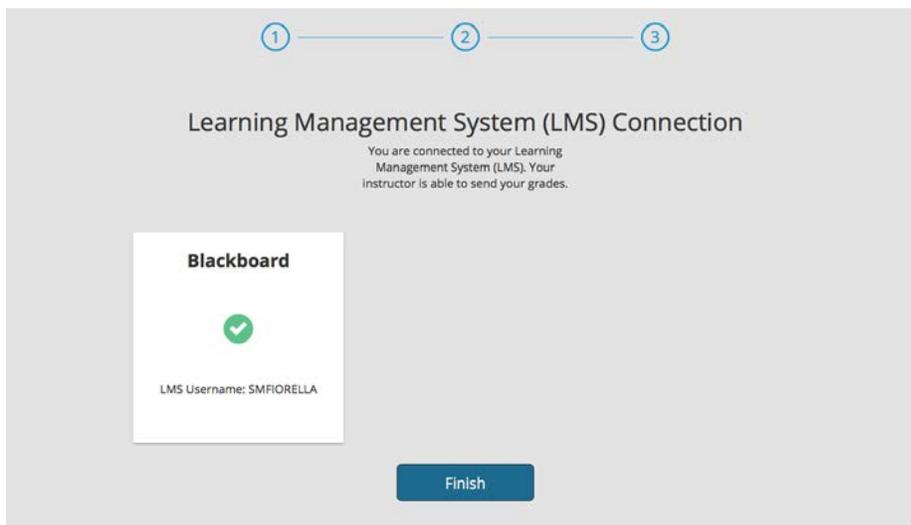

5. The next screen requires you to redeem your license. Enter the code included with your license into the **Subscription Code** field. Click **Redeem**. Then click **Continue**.

6. On the next screen, enter the device ID found on the back of your clicker in the **Clicker ID** field. Click **Add**. Click **Continue**.

7. On the final screen, click **Finish**.

Your clicker is now functional and ready for use in class.
